

DECLARATION OF CONFORMITY

YOU BRANDS

HANDELSKOMPANIET AS
Bølevegen 208, 3713 Skien, Norway

Declares under our sole responsibility that the following product:

**THERMO CUP
5296 LEIDEN**

has been manufactured in full compliance
with the requirements of the following directives:

Directives:

- EU No 10/2011 with amendments.
- Directive 82/711/EEC, Council Directive 85/572/EEC and its corresponding regulations

Test methods / Standards:

The migratory behaviour is examined with reference to Chapter V, Article 18 of Commission Regulation 10/2011 and its amendments. Deviating to the regulations the following tests were performed as orientating single tests. Limit: With Reference to Commission Regulation (EU) No 10/2011 and its amendments.

The migratory behaviour is examined in accordance with Directive 82/711/EEC and Council Directive 85/572/EEC and its corresponding regulations. Deviating to the regulations the following tests were performed as orientating single tests. Limit: Resolution AP (2004) 5 on silicones used for food contact applications.

The migratory behaviour is examined with reference to Chapter V, Article 18 of Commission Regulation 10/2011 and its amendments. The determination of amounts of metals that were released is done via ICP-MS. Limit: Commission Regulation (EU) No 10/2011 and its amendments.

The sample preparation is performed with reference to "Technical Guide on Metals and alloys used in food contact materials". Test conditions were chosen with reference to Directive 82/711/EEC, Council Directive 85/572/EEC and its corresponding regulations. The determination of amounts of metals that were released is done via ICP-OES and ICPMS with reference to ISO 11885:2007 / DIN EN ISO 17294, respectively. Limit: Technical Guide on Metals and alloys used in food contact materials.

General use:

Area of use: Hot and cold drinks. Usage temperature: Min: 1 ° C. Max: 100 ° C.

Wash, rinse and dry the thermo cup before first use. Hand wash ONLY! Wash with water and/or detergent. Use gentle detergent. Never wash the thermo cup in the dishwasher.

Preheat the thermo cup with either hot or cold water to keep the drink at the desired temperature. Never put the thermo cup in the microwave, oven or freezer.

Carbonated beverages should not be stored in the thermo cup as they can create pressure that pushes up the lid with great force. The same can happen if sugary drinks in the thermo cup are exposed to heat. The fermentation process that can start will also push the lid open.

Be careful when using the thermo cup for hot dairy products or baby food. Bacteria develop quickly and starts a fermentation process. If dairy products and/or baby food are still stored in the cup, it should only be for a short time. The thermo cup must then be thoroughly cleaned.
