HANDELSKOMPANIET AS
Bølevegen 208, 3713 Skien, Norway

Declares under our sole responsibility that the following product:

THERMO BOTTLE 5297 WATERLOO

has been manufactured in full compliance
with the requirements of the following directives:

Directives:

- EU 2004/1935
- EU No 10/2011 with amendments.

Test methods / Standards:

Materials:

- Body: Stainless Steel 91%
- Black body coating: Polyurethane resin 1%
- Lid: Plastic, PP 6%
- Gasket (inside) in lid: Silicone 1%
- Black ring on lid: Silicone 1%

3.1 Specific Release of Metals

Test method:

The sample preparation is performed with reference to "Technical Guide on Metals and alloys used in food contact materials". The migratory behavior is examined with reference to Chapter V, Article 18 of Commission regulation 10/2011 and its amendments. Presence of elements were detected by means of ICP-MS.

Limit:

Technical Guide on Metals and alloys used in food contact materials

3.2 Global Migration

Test method:

The migratory behavior is examined with reference to Chapter V, Article 18 of Commission Regulation 10/2011 and its amendments. Deviating to the regulations the following tests were performed as orientating single tests.

Limit:

Commission Regulation (EU) No 10/2011 and its amendments

3.3 Global Migration from Silicone

Test method:

The migratory behavior is examined with reference to Chapter V, Article 18 of Commission regulation 10/2011 and its amendments. Deviating to the regulations the following tests were performed as orientating single tests.

Limit:

Resolution AP (2004) 5 on silicones used for food contact applications

3.4 Specific Migration of metals, Metal-release from Plastic

Test method:

The migratory behavior is examined with reference to Chapter V, Article 18 of Commission Regulation 10/2011 and its amendments. The determination of amounts of metals that were released is done via ICP-MS.

Limit:

Commission Regulation (EU) No 10/2011 and its amendments

3.5 Colorfastness

Test method:

Resolution AP (89) 1 on the use of colorants in plastic materials coming into contact with food, Appendix III

Limit:

Resolution AP (89) 1 on the use of colorants in plastic materials coming into contact with food - No transfer of colorants to foodstuffs is permitted

DECLARATION OF CONFORMITY

THERMO BOTTLE 5297 WATERLOO

General use:

Area of use: Hot and cold drinks. Usage temperature: Min: 1 ° C. Max: 100 ° C. Temp. duration: min. 6 hours.

Wash, rinse and dry the thermal bottle before first use. Hand wash ONLY! Wash with water and/or detergent. Use gentle detergent. Never wash the thermal bottle in the dishwasher.

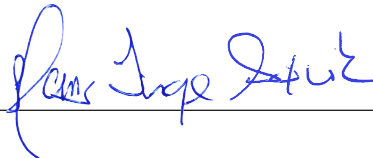

Preheat the thermal bottle with either hot or cold water to keep the drink at the desired temperature. Never put the thermal bottle in the microwave, oven, or freezer.

Carbonated beverages should not be stored in the thermal bottle as they can create pressure that pushes up the lid with great force. The same can happen if sugary drinks in the thermal bottle are exposed to heat. The fermentation process that can start will also push the lid open.

Be careful when using the thermal bottle for hot dairy products or baby food. Bacteria develop quickly and starts a fermentation process. If dairy products and/or baby food are still stored in the bottle, it should only be for a short time. The thermal bottle must then be thoroughly cleaned.
